Professional Summary

Data & Automation Analyst with 6+ years turning manual reporting into fast, governed pipelines across fleet operations, reinsurance, and finance. Recently cut a 2-day consolidation to 14 minutes and a 2-hour dispatch process to under a minute using SQL (Snowflake), Power BI, Python, Excel/VBA, and LLM workflows (Claude, GPT). Founder of UffDeli, a live App Store product built end-to-end with AI-assisted development. Seeking a remote Data / Analytics / Automation role.

Work Experience

Data Analytics & Operations Planning Specialist — **Element Fleet Management** | *Feb 2026 – Present*

Operations Planning & Analytics | Fleet Data, BI & Process Automation

- Cut Remarketing / End-of-Lease direct-sales consolidation from **2 days of manual work to a 14-minute run** with a VBA engine that merges and reconciles 10 Excel sources into one governed dataset
- Replaced a 2-hour work-order dispatch with an automated pipeline: cleans a **433K-row file in 42 seconds**, batches the top 4 vendors, pushes to Smartsheet with per-vendor views, and ingests responses into the system-upload report
- Built an AI documentation pipeline (custom GPT + Claude) turning recorded process calls into SOPs, manuals, and flows in ~5 min, **cutting review time from 2 hours to 40 minutes**
- Designed Power BI star-schema models (DAX) for operations planning and hardened Snowflake SQL views feeding work-order tracking, fixing data-quality defects that corrupted downstream reports

Service Offering Manager — North America — **Lenovo** | *Feb 2022 – Feb 2026*

Business Enablement & Process Analytics | NA Services Portfolio

- Reduced turnaround time by 20% through enablement and workflow-visibility analytics initiatives
- Delivered KPI dashboards and reports for Operations, contributing to a 25% increase in customer satisfaction
- Partnered with Sales, Cost, and Operations to strengthen forecasting accuracy and portfolio governance
- Established data governance standards adopted by 100% of the team

Claims Examiner — LATAM — **Swiss Re** | *Mar 2020 – Jan 2022*

Operational Risk & Data Analysis | Reinsurance Claims

- Increased reporting accuracy by 25% through improved SQL/Excel processes, documentation standards, and ETL workflows
- Reduced processing time by 13% by streamlining cross-department communication flows
- Supported portfolio reviews with data reconciliation, bordereau analysis, and loss-ratio insights

FP&A Finance Intern ITO — LATAM — **General Electric** | *Aug 2018 – Feb 2020*

Sales Operations & Reporting Support

- Improved finance report accuracy by 20% through Salesforce data integration and process optimization
- Increased sales data reliability by 15% and documentation efficiency by 85% via automation and standardized templates

Founder Project

Founder & Product Builder — **UffDeli** | *2025 – Present*

Restaurant-discovery subscription app for tourists & expats in Mexico City — live on the App Store

- Shipped and maintain a production iOS app (React Native/Expo, Supabase/PostgreSQL, serverless API on Vercel) with in-app subscriptions, a 900+ venue directory, and an admin panel; built the full data layer (schema, Google Places enrichment, ETL jobs, RLS, webhook-driven subscription state)
- Run an AI content engine (LLM copy, ElevenLabs voice-over, ffmpeg video) for weekly marketing; develop end-to-end with Claude Code and agent workflows; filed the trademark independently through IMPI

Education

Universidad Iberoamericana, Mexico City — **B.Eng., Industrial Engineering**

Core Skills

- **Analytics & BI:** SQL (Snowflake, PostgreSQL), Python (Pandas, NumPy), Power BI (DAX, star schema), Tableau, Excel (Advanced, VBA)
- **Automation & AI:** VBA/ETL pipelines, Smartsheet integrations, KPI design & governance, SOP documentation, Claude Code, custom GPTs, prompt & agent design
- **Systems:** Supabase, React Native/Expo, Vercel, Git/GitHub, Salesforce, Jira, MongoDB, ERP
- **Languages:** English (Fluent), Spanish (Native)

Certifications & Projects

- **Certifications:** IBM Data Analyst Pro (In Progress) · Google Data Analytics (Coursera, 2024) · Codecademy SQL/Excel/MongoDB
- **Portfolio**: Excel Consolidation Engine (VBA) · Work-Order Batch Pipeline (VBA + Smartsheet) · AI SOP Generator (GPT + Claude) · UffDeli Data Layer (Supabase/Python)
